

LYNN Ethernet Patch Cables

LYNN Ethernet patch cables offer reliable, versatile solutions for any networking application, with three series to suit your needs: ProFIT delivers superior performance and durability for demanding environments, OptiLink+ balances price and performance, and CHOICE provides quality at a competitive price. All are available in standard or 28AWG slim jackets for flexibility and compatibility in your network setup.

PROFIT

The ProFIT series sets the standard for premium Ethernet cables, delivering unmatched quality and performance for the most demanding installations. This series is 100% manufactured and tested in the United States and are engineered to exceed expectations, ensuring reliable connectivity and durability for even the toughest environments.

ProFIT

Standard Jacket

28AWG Slim Jacket

LYNN offers three series of copper patch cords depending on your application. ProFIT is designed for the most demanding environments, Optilink+ balances price and performance, and CHOICE delivers a quality cable at a competitive price. All three are available in standard jacket or 28AWG slim constructions.
